

GAMING HEADSET for SONY PS3®

User Information

Introduction

Congratulations on your purchase of Dattel's Gaming Headset™ for SONY PS3®. Now you can take charge in PS3® games with talk or voice control features.

Connecting and using your PS3 Gaming Headset

1. Connect the 2.5 headphone jack plug of the Gaming Headset into the socket on the USB headset adapter.
2. Connect the USB headset adapter to a free USB port on your PS3® console.
3. Fit the headset over your head, aligning the padded speaker with your ear and the mouthpiece to the side of your mouth.

Note

Correct placement of your headset and microphone is important to using your headset successfully in your games. The mouthpiece is designed to point the microphone towards your mouth without actually being directly in front of it. This is to ensure good pick up of your voice without picking up your breathing.

Configuring your PS3® to use the Gaming Headset

1. On your PS3's browser menu go to 'Settings' then 'Accessory Settings'.
2. Under 'Input Device' select the device 'C-Media USB Audio Device' as Input and Output Device and choose OK. You should see the microphone level displayed on screen confirming the headset is working correctly.
3. If necessary, use the 'Microphone Level' setting to adjust the sensitivity of the microphone in the PS3 Gaming Headset.
4. You are now ready to start your game or chat session.

Consult the documentation that came with your game or console for information on how to use the chat feature in your chosen software.

Hearing Loss

Prolonged exposure to loud volumes may result in temporary or permanent damage to your hearing. Be careful to not set the volume level too high on your headset and take regular breaks when gaming or chatting.
