COMMUNICATOR HEADSET

For use with SONY PSP®

Introduction

Congratulations on your purchase of Datel's Communicator Headset SONY PSP®. Now you can take charge in PSP games with talk or voice control features.

Connecting your headset to your controller

1. Plug the special connector into the headphone port at the bottom left of your PSP console. Ensure that the connector plugs in all the way.
2. Fit the Communicator Headset over your ear and align the microphone.

Note: Correct placement of your headset and microphone is important to using your headset successfully in your games. With the earpiece looped over your ear, angle the mouthpiece towards your mouth. The mouthpiece is designed to point the microphone towards your mouth without actually being directly in front of it. This is to ensure good pick up of your voice without picking up your breathing.

Hearing Loss

Prolonged exposure to loud volumes may result in temporary or permanent damage to your hearing. Be careful to not set the volume level too high on your headset and take regular breaks when gaming or chatting.

For information about using your headset with a specific game, see your game's manual.

Technical Support

Before contacting Datel's customer service department, please ensure that you have read through and understood the information in this manual.

Please ensure that you have information on when and where you purchased this product to hand.
