

INSTRUCTION MANUAL

COMMUNICATOR HEADSET

For use with Nintendo® DS™ and DS Lite™

Introduction

Congratulations on your purchase of Datel's Communicator Headset for Nintendo® DS™ and DS Lite™. Now you can take charge in all DS™ games with talk or voice control features.

Connecting and using your Communicator Headset

1. Use the volume slider on your DS™ to turn the volume right. Connect your Communicator Headset to the corresponding socket on your DS™.

Note

Correct placement of your headset and microphone is important to using your headset successfully in your games. With the earpiece looped over your ear, angle the mouthpiece towards your mouth. The mouthpiece is designed to point the microphone towards your mouth without actually being directly in front of it. This is to ensure good pick up of your voice without picking up your breathing.

2. You are now ready to start your game or chat session. Start your game or chat and set the volume to a comfortable level using the volume slider on your console.

Hearing Loss

Prolonged exposure to loud volumes may result in temporary or permanent damage to your hearing. Be careful to not set the volume level too high on your headset and take regular breaks when gaming or chatting.

For information about using your headset with a specific game, see your game's manual.

Troubleshooting

You can't hear anything

Check that:

- The volume isn't turned right down.
- The headset connector is plugged in all the way into the socket on your console.

Others can't hear you

Check that:

- The headset connector is plugged in all the way into the socket on your console.
- You don't need to press a button to speak in your game (look in your games manual).

Technical Support

Before contacting Datel's customer service department, please ensure that you have read through and understood the information in this manual.

Please ensure that you have information on when and where you purchased this product to hand.
